

EVOLUTION

Words and Music by Fabian Scheibe and Patrick Scheibe

In the beginning was no life
nowhere on earth nowhere at all.
But few years later some kind of fish
was swimming through the mud.
One of them tried to breath the air
and lost his fin and lay on beach
and on and on and on and on
first human beeing was born.

And when you wake up without your hair
dont give a f*** it's evolution
when you can see behind a wall dont care
its just an evolution
the dentist takes your wisdom tooth
they're superfluous, its evolution
the girls have sex when they are twelve thats cool,
I love the evolution

Come on an think about this stupid thing,
we call it evolution
what will happen with the human race
and what will change our life
What could we do if we get superbrains
inside of ugly heads
Will we have as much intelligence
as we need to save our earth?

And when you wake up without your hair
dont give a f*** it's evolution
when you can see behind a wall dont care
its just an evolution
the dentist takes your wisdom tooth
they're superfluous, its evolution
the girls have sex when they are twelve thats cool,
I love the evolution
